Deepika Harishankar

Database developer

👤 Profile

- Experienced DB2 developer with experience in query optimization and performance tuning of stored procedures.

- Certified Data Science analyst with a keen interest in data analytics using Python and Tableau.

- Comfortable with Pycharm IDE. Have used python modules like Pandas, Tkinter, SMTP, Beautiful soup.

- Have used REST API and have performed web scraping using Selenium for extracting data for data analysis.

💼 Employment History

Systems Engineer at Tata Consultancy Services, Banglore , India

September 2010 — December 2013

DB2 developer - Bank of America

Financial Advisor's eligibility project : Worked on stored procedures, triggers UDFs and fine tuning of query. Developed native SQL stored procedures and deployed them in QA and production environments.

Single experience project : BOFA-Merrill Lynch initiative for a common enrollment into wealth management products. As a scratch initiative, it provided me the opportunity to take part in LLD and HLD design .

Collaborated with business analysts and worked on all developmental stages from creating entity relationship diagrams till the implementation of stored procedures in different environments.
